DR LI BAIGUANG CHINA

#IWillNotAbandonThem

Chinese campaigner for Christian freedom Dr Li Baiguang, an internationally renowned human rights lawyer, died in a military hospital hours after checking in for a stomach complaint.

The hospital said he had bled to death due to a liver condition but Dr Li, who was only 49 years old and neither drank nor smoked, had been in good health shortly before. He reportedly died of 'liver failure' after returning to China from the US. Dr Li had said he had felt threatened after attending the National Prayer Breakfast in Washington. He is survived by his wife and young son. Other human rights defenders have died in similarly suspicious circumstances.

Please pray that God would comfort Dr Li's family, and the families of other human rights lawyers, pastors and Christian leaders who have died in prison.

Thank God that Release's partner China Aid provide legal aid, advocacy, and, where possible, prison visitation to Christian lawyers, pastors and others who are imprisoned.
